

FAA'S CASE STUDY

PROJECT SUMMARY

The Federal Aviation Administration is the national aviation authority of the United States. As an agency of the United States Department of Transportation, FAA has authority to regulate and oversee all aspects of American civil aviation. FAA is in a process of implementing cost accounting system and Noblesoft employees acted as project leads and managers in deploying **cost accounting system in the Federal Marketplace**.

AT A GLANCE

Challenges

- The internal IT Team was facing a challenge with the implementation of projects.

Benefits

- Responsible for overall success of 5-million-dollar project with 23 active resources.

SOLUTIONS

Noblesoft has provided Project Leads and Managers to handle project executions. Activities performed by our resources include:

- Ensure services are successful in Government marketplace.
- Responsible for software element of a congressionally mandated cost accounting system implementation.
- Provide project status and recommendations directly to FAA director of Cost and Performance Management
- Integrate Government legacy systems into Custom product line; work with FAA internal organizations to determine correct allocation of costs to service delivery points..

RESULTS

Completed the project on time and our managers and leads handled the project in a most effective process which helped FAA to complete the project within the defined budget and timelines
