

GALAXY FOOD - CASE STUDY

PROJECT SUMMARY

Galaxy Foods is a worldwide marketer and manufacturer of branded speciality foods that operates a B2B information portal for regional managers and brokers who sell their products. This portal is the primary source of sales information for the company's products. It was originally built from Lotus notes suffering several inherent limitations. Galaxy Foods collaborated with Noblesoft to build a common portal where they can access all the records and documents.

AT A GLANCE

Challenges

The existing sales portal was:

- Hard to update/navigate
- Difficult to administer
- Limited Security and difficult navigation

SOLUTIONS

Noblesoft team was engaged to create a companywide portal that can store and display records and documents and provided user training for their employees.

RESULTS

- Installed and configured Microsoft SharePoint Portal
- Created branding and rich look & feel of the site.
- Created custom Microsoft Web parts to incorporate
- Defined of company's process and measurements
- Display of measurements results
